```java
1 package expenses.manager;
2
3 import java.util.Vector;
4
5 public interface IViewModel {
6     public void setIncome(String date, double amount);
7     public void setExpenses(String type, String date,double
  amount);
8     public void getTableInfo();
9     public void getInclomeAndExpensesByMonth();
10     public void getTotalExpensesByTypeCurrMonth();
11     public void getTotalExpensesByTypeCurrYear();
12     public void setModel(IModel m);
13     public void setView(IView v);
14 }
15
```
